The City of Boynton Beach (City) oversees and maintains 310 miles of sanitary sewer gravity mains, 167 pumping stations and roughly 8,000 sanitary sewer manholes. The SmartLevel system provides a cost-effective solution for satellite manhole monitoring, helping utilities prevent sewer overflows, optimize collection system maintenance, and accurately detect inflow and infiltration (I&I). Its powerful data management and analytics platform enables real-time monitoring, allowing for improved system performance, reduced operational costs, and more efficient resource allocation.
