

City of Boynton Beach Agenda Item Request Form

Meeting Date: 01/20/2026

Proposed Resolution No. R26-010- Award Invitation to Bid No. 25-082B, Sanitary Sewer Gravity Main- CIPP Project, to Cobra Environmental, Inc., and approve the Agreement between the City and Cobra Environmental, Inc. in the amount of \$599,565, plus an additional 10% contingency in the amount of \$59,956.50 for staff-authorized change orders to address unforeseen conditions, bringing the total not-to-exceed contract and purchase order amount to \$659,521.50. Additionally, approve a budget transfer to allocate sufficient funding for this project. This work will be completed in San Castle, Brighton Lakes, and various locations in the western communities of the City of Boynton Beach.

Requested Action:

Staff recommends approval of Proposed Resolution No. R26-010.

Explanation of Request:

The Utilities Department is undertaking the Sanitary Sewer Gravity Main–CIPP Project to rehabilitate aging gravity sewer infrastructure at multiple locations throughout the City using cured-in-place pipe (CIPP) lining technology. This trenchless rehabilitation method extends the service life of existing sewer mains, reduces infiltration and inflow, minimizes surface disruption in residential neighborhoods, and improves overall system reliability.

On August 22, 2025, the Procurement Division, in coordination with the Utilities Department, issued Invitation to Bid (ITB) No. 25-082B. The solicitation closed on October 24, 2025, and seven (7) bids were received and publicly opened via the City's Bids & Tenders e-procurement system.

Following a comprehensive review and evaluation, Cobra Environmental, Inc. was determined to be the lowest responsive and responsible bidder with a base bid amount of \$599,565.00. The bid includes CIPP lining of approximately 8,920 linear feet of existing 6-inch, 8-inch, 10-inch, and 12-inch gravity sewer mains located in Chapel Hill, San Castle, Brighton Lakes, Heart of Boynton, Rolling Green, and other identified service areas, including all associated cleaning, CCTV inspections, bypass pumping, traffic control, restoration, and incidentals required to complete the work in accordance with the contract documents.

City staff recommend approval of the Agreement with Cobra Environmental, Inc., plus a 10% contingency to allow for staff-authorized change orders addressing unforeseen field conditions typical of sewer rehabilitation projects, such as point repairs, access constraints, or unknown pipe conditions. This contingency ensures schedule continuity and minimizes the need for return trips to the City Commission.

How will this affect city programs or services?

Construction activities will occur within active wastewater collection systems and predominantly within public rights-of-way in residential areas. The Utilities Department will coordinate closely with the contractor to manage temporary bypass pumping, traffic control, and public notifications in accordance with contract requirements. While localized, short-term impacts may occur, this project will significantly reduce the risk of sewer failures, overflows, and emergency repairs, thereby improving the reliability and resiliency of the City's wastewater collection system.

Budgeted Item: Yes

Account Line Item and Description:

403-50000-535-65.04- Project SW2507 (Sanitary Sewer CIPP) - \$0 Available.

403-5000-535-65.04- Project SW1801- Sewer System Pipes & Manholes R&R- \$1,708,008 available in project SW 1801 (\$708,008 Roll over funds, + \$1,000,000 Adopted 25/26 budget).

Fiscal Impact:

This project represents a planned capital expenditure within the Utilities Department's Sewer Rehabilitation and Replacement program. Sufficient funding is available in the adopted CIP budget to support the recommended award.

Budget Transfer \$659,521.50 from Project SW1801 to Project SW2507.
