

City of Boynton Beach Agenda Item Request Form

Meeting Date: 02/ 3/2026

Proposed Resolution No. R26-014- Approve Appropriation Agreement No. L0148 between the Florida Department of Environmental Protection and the City of Boynton Beach in the amount of \$500,000 for the Boynton Beach Sanitary Sewer Collection System Improvement Project, and authorizing the Mayor to execute all associated documents.

Requested Action:

Staff recommends approval of Proposed Resolution No. R26-014.

Explanation of Request:

The Boynton Beach Sanitary Sewer Collection System Improvement Project addresses aging clay sewer pipes within the City of Boynton Beach utility service area that have exceeded their useful life. Pipe defects and failures result in sewer blockages, potential sewer overflows, and infiltration and inflow (I&I). To address these issues, the project will install Cured-in-Place Pipe (CIPP) lining to identified segments of the existing sewer main. These improvements to the sewer main pipes aim to enhance the system's reliability, protect public health, and prevent excessive I&I flows into the city's collection system or contaminated runoff into surrounding aquatic habitats. This implementation will extend the lifespan of critical sewer infrastructure, thereby minimizing the risk of system failures, infiltration, and inflow issues, and the need for expensive emergency repairs.

The project was approved through the State of Florida appropriation process for FY2025-2026. The Florida Department of Environmental Protection awarded \$500,000 in funding to support the implementation of this project.

How will this affect city programs or services?

The funding will improve the reliability and efficiency of the Utility sewer system and will contribute to long-term public health protection and economic stability in the region.

Account Line Item and Description: N/A

Fiscal Impact:

The Florida Department of Environmental Protection offered \$500,000 to fund the project.
