

## **City of Boynton Beach Agenda Item Request Form**

**Meeting Date: 05/20/2025**

**Proposed Resolution No. R25-128- Approving Modification No. 1 to the Hazard Mitigation Grant Program Contract No. H0712 between the City and the Florida Division of Emergency Management to reinstate and extend the term until December 31, 2025, and increase the Federal Funding by \$632,972.75 for a total funding of \$1,433,724.75.**

**Requested Action:**

Staff recommends approval of Proposed Resolution No. R25-128.

---

**Explanation of Request:**

The Lakeside Gardens community is prone to flooding during spring and king tides, storm events, and periods of prolonged rain and implementation of the drainage improvements will provide an improved level of service that reduces nuisance flooding and standing water in the neighborhood.

In October 2021, the City Commission approved and authorized the Hazard Mitigation Grant Programs cost-reimbursement Contract (No. H0712) for Phase II of Lakeside Gardens Neighborhood. The grant provided a reimbursable matching grant in the amount of \$800,752.00 in Federal funds with a local cost-share of \$ 425,580.00. In this Modification No. 1, the Agreement is amended to increase the federal funding by \$632,972.75, for the maximum amount payable of \$1,433,724.75. The project's construction has a Period of Performance through December 31, 2023. This Agreement is now being extended to December 31, 2025.

The Hazard Mitigation Grant Program project will provide an upgraded drainage system along Dimick Road, Potter Road, and North Lake Drive in Lakeside Gardens Neighborhood, located in Boynton Beach, Florida 33435.

The HMGP Phase II – Construction scope of work proposes an upgraded drainage system that includes roadway drainage and stormwater piping activities. Pavement and curbing shall be demolished and removed before the roadways are regraded on Dimick Road, Potter Road,

and North Lake Drive. Proposed grading may constitute elevation and widening activities, but the primary improvements are road slope, new curbs, and catch basins. All work shall tie back to the existing grade. New 24" RCP stormwater piping and corresponding structures shall be installed along Dimick Road. New 15", 18", 24," and 36" RCP stormwater piping and corresponding structures shall be installed along Potter Road, as well as 6" PVC stormwater outfall piping. New 18" RCP stormwater piping and corresponding structures shall be installed along North Lake Drive. 6" and 8" water line work shall take place on Potter Road and North Lake Drive to prevent utility conflicts. The drainage system shall tie into the existing infrastructure and includes the retrofit of the existing North Lake Drive stormwater outfall. An additional outfall location is proposed at the end of Potter Road, this shall also be 36" RCP and 6" PVC stormwater piping. Both locations are proposed as the discharge points into the intercostal waterway. The project shall provide protection against a 100-year event. Activities shall be completed in strict compliance with Federal, State, and Local applicable Rules and Regulations.

**How will this affect city programs or services?**

The City of Boynton Beach, dedicated to the health and well-being of its residents, finds it imperative to accept and approve Modification No. 1. This critical construction project will provide an improved level of service that reduces nuisance flooding and standing water in the Lakeside Gardens neighborhood.

**Budgeted Item:** Yes

**Account Line Item and Description:** 403-5000-538.65-09 UTIL CONST IN PROGRESS / R&R - STORMWATER  
403-5000-533.65-02 UTIL CONST IN PROGRESS / R&R - WATER  
403-5000-535.65-04 UTIL CONST IN PROGRESS / R&R - SEWER SANITARY

**Fiscal Impact:**

The Hazard Mitigation Grant Program offered by the Florida Division of Emergency Management is expected to fund up to (75%) \$1,433,724.75 with a \$477,908.25 (25%) City match.
