

Memorandum

REPORT TO: City Commission

FROM: Shawn Kohtz, Utilities Director
Adam Oliver, Stormwater Program Manager

SUBJECT: A Resolution Adopting the 2025 Stormwater Facilities Plan

MEETING DATE: May 6, 2025

AGENDA ITEM TYPE: Resolution

RECOMMENDATION: Consider the Motion: "Having considered the draft 2025 Stormwater Facilities Plan, all public comment, and information received, I hereby adopt the findings of the proposed Resolution and adopt the Resolution with an effective date of May 6, 2025."

STRATEGIC PLAN: 4.3 Strategic Infrastructure Choices: Prioritize long-term investment and maintenance for existing and new infrastructure.

BACKGROUND: As the community continues to grow, existing infrastructure ages, and regulations evolve, a comprehensive update to the 2008 Stormwater Facilities Plan is needed to ensure the City can continue to meet its level of service, accommodate growth, and comply with the MS4 General Permit.

The 2025 Stormwater Facilities Plan is a master plan of the City's stormwater collection system and administrative programs. The plan encompasses a wide scope of items ranging from storm sewer system modeling, evaluation of storm sewer system performance, identification of system deficiencies, development of a comprehensive capital improvement plan to address storm sewer system needs, MS4 General Permit compliance recommendations, inform levels of service, and funding.

The goals of the 2025 Stormwater Facilities Plan are to provide the community with resources and tools to continue meeting the City's Strategic Plan by fostering a well-planned City, promoting a sustainable environment, providing capital improvements for existing and new infrastructure, and ultimately helping guide public funds to the right project at the right time to maximize benefit at minimum cost.

The 2025 Plan was recently presented to both the [Sustainability Board](#) and [Community Development Board](#).

UNRESOLVED ISSUES: None

ALTERNATIVES: As suggested by the Commission.

FISCAL EFFECTS: The 2025 Stormwater Facilities Plan does not directly authorize spending. However, the plan informs levels of service, infrastructure investment strategy, and Stormwater Program scope.
