SUMMARY

PROJECT DESCRIPTION:

On September 17, 2024, Council approved the contract with Purifics Water Inc. for the continuous ultra-filtration (CUF) system which is anticipated to be delivered in May 2026. The new treatment system is required because the Tartesso water system is experiencing elevated levels of arsenic and fluoride in the raw water supply. To operate the wells without concern of exceeding the maximum contaminant levels (MCL), treatment of both constituents is required. Through the use of the city's JOC, Schofield will construct a climate-controlled building for the CUF system, in an amount not to exceed \$1,545,182.

Maintaining effective treatment systems for the ensured delivery of safe and reliable water services.
