ACTION/MOTION: (This language identifies the formal motion to be made by the Council)
Council to take action on the request to approve a supplemental funds repurpose for the Police Department.

SUMMARY

PROJECT DESCRIPTION:

The Police Department is seeking approval to procure a service monitor that is critical for the testing, calibration, and ongoing maintenance of the public safety radios used by our Police and Fire Departments. This equipment ensures that our communications systems remain compliant with manufacturer specifications and operate at peak performance.

This investment directly supports the mission-critical operations of our public safety departments and reinforces our commitment to maintaining a high standard of service for the community.

BENEFITS:

The selected service monitor package is specifically configured to support the Motorola radio models currently deployed across both departments. By acquiring this device, we will gain the ability to perform in-house diagnostics and calibration, which offers several key benefits:

- **Improved Reliability:** Ensures that all radios used by first responders are functioning within optimal parameters, reducing the risk of communication failures during emergency operations.
- **Cost Efficiency:** Minimizes the need for outsourcing maintenance and calibration services, resulting in long-term cost savings.
- **Operational Readiness:** Enables quicker turnaround times for radio servicing, keeping more units in the field and available for use.
- **Regulatory Compliance:** Helps maintain compliance with industry standards and manufacturer maintenance requirements, which is essential for warranty coverage and system integrity.
- **Support for Public Safety:** Enhances the overall effectiveness and safety of our Police and Fire personnel by ensuring dependable communication tools.

FUTURE ACTION:

Possible procurement of an additional module as expansion of service continues.
