Strategic Priority	Operational Excellence

SUMMARY

Carver County replaced the traffic signal at Powers Blvd and W 78th St in the fall of 2024. The city was a cost share partner on the project as W 78th St is a city street. As part of the project, the design consultant did a re-timing of all of the other traffic signals along W 78th St. The purpose of the re-timing was to align the signal cycle times to operate in a coordinated fashion to allow for more efficient vehicular traffic flow.

The attached technical memo provides a summary of the cost/benefit of doing this work.

This is an informational item only, no action is required.
