

SUBJECT:

Motorola Genesis Software Upgrade.

MEETING DATE:

April 2, 2024

SUBMITTED BY:

Tye Beavers

SUGGESTED ACTION:

Consider approval of a request from the Radio Technology Department for the purchase of a software upgrade from Motorola to enhance analytics and historical tracking of existing Motorola radios in the amount of \$58,500.00.

FACTS AND ISSUES:

Cherokee County's Motorola radios include the Genesis reporting system. The Radio Technology Department is requesting to implement a Motorola software upgrade package that will improve the ability to track historical location and analytics information for the radios. The radios are manufactured by Motorola, and this is a sole source solution that only Motorola produces for this type of analysis.

Funding for this purchase comes from the Radio Technology department's FY2024 budget.
