

SUBJECT:

Audio-visual equipment upgrades for Cherokee Hall.

MEETING DATE:

October 4, 2022

SUBMITTED BY:

Mike Haines

SUGGESTED ACTION:

Consider approval of proposal from AGT, for upgrading the audio-visual equipment in Cherokee Hall to commercial standards at a cost of \$55,940.23.

FACTS AND ISSUES:

Cherokee Hall has been using residential grade equipment for its AV needs since 2010 when multiple vendors attempted to rectify issues we were having in the room. ARPA funds are allowing us to upgrade these unreliable systems to commercial AV standards seen in multiple conference centers around the state. AGT is also providing maintenance and helpdesk support for their installation giving Cherokee IT a much needed resource in troubleshooting and repairing AV issues at the Bluffs.

Four proposals were received with AGT being the lowest price proposal. This project is being funded with ARPA funds.
