

SUBJECT: **Preventative Maintenance and Repairs Agreement for Fire & Emergency Services.** **MEETING DATE:** November 19, 2024

SUBMITTED BY:
Amanda Postelle

SUGGESTED ACTION:

Consider request from Fire & Emergency Services to authorize Stryker Sales, LLC to perform annual preventative maintenance on all Stryker stretchers, power load systems, stair chairs and Lucas chest compression devices in the amount of \$24,817.20, and a not-to-exceed amount of \$50,000 for as-needed parts and repairs throughout FY2025.

FACTS AND ISSUES:

Fire & Emergency Services has standardized on Stryker for all stretchers, power load systems, stair chairs and chest compression devices. Stryker performs annual preventative maintenance on this equipment as well as any necessary repairs. The cost for the preventative maintenance is \$24,817.20. This equipment is coming out of warranty and the annual cost for repairs and parts is expected not-to-exceed \$50,000 and will be paid based on the actual repairs performed/parts purchased. The FY2024 actual repair costs were \$28,935.38.

Both the preventative maintenance and repairs are budgeted in the EMS FY2025 budget. Stryker Services is considered a sole source for this maintenance.
