

SUBJECT: **MEETING DATE:**
Additional Cloud Space for Government Cloud Backup Solution. January 7, 2025

SUBMITTED BY:
Kristi Coleman

SUGGESTED ACTION:

Consider request from IT Department for purchase of additional cloud space for the Government Cloud Backup Solution in the total amount of \$155,789.73, including three years of support.

FACTS AND ISSUES:

The IT Department purchased the Government Cloud Backup Solution in July 2024, which provided 120 TB of storage to accommodate the County's anticipated needs for the three-year contract term. Due to unforeseen data growth stemming from increased public safety and judicial services, including the retention of body camera footage, evidence and cell phone data, the storage capacity has quickly been depleted with only 13 TB remaining. To ensure continuity of critical operations and compliance with legal and regulatory requirements, the IT Department is requesting the purchase of an additional 75 TB of storage, bringing the County's total storage capacity to 195 TB. This expansion will provide the necessary space to accommodate future data growth and safeguard essential records and information.
