

SUBJECT:

**Shoal Creek Road over Puckett Creek
Improvement - Amendment 1 to Construction
Agreement.**

MEETING DATE:

November 21, 2023

SUBMITTED BY:

Jim Wilgus

SUGGESTED ACTION:

Consider approval of Amendment 1 to the Construction Agreement for the Shoal Creek Road over Puckett Creek Improvement Project with J.G. Leone, Inc., in the amount of \$58,110.00.

FACTS AND ISSUES:

Shoal Creek Road is an existing two-lane asphalt roadway that is located off of Waleska Road outside of the City of Canton.

The project includes improving the substandard Shoal Creek Road stream crossing over Puckett Creek with the installation of a concrete box culvert and improving the substandard roadway geometry on Shoal Creek Road for a distance of approximately 1,100 feet immediately west of the stream crossing. The design speed for the roadway is 25 MPH.

As part of the construction, the Hembree Water System water main relocation was intended to tie into the City of Canton's water system in the Laurel Canyon subdivision. In the field it was determined that the water system in Laurel Canyon was not installed as per the development plans, making the tie-in difficult. Amendment 1 to the Construction Agreement provides a different water main tie-in through the project.

The Engineering Department has reviewed the amendment and recommends that it be approved.
