

**SUBJECT:**  
**Speed Hump Request - Owens Road**

**MEETING DATE:**  
October 18, 2022

**SUBMITTED BY:**  
Brett Buchanan

---

**SUGGESTED ACTION:**

Consideration of a petition for the installation of three (3) speed humps on Owens Road.

---

**FACTS AND ISSUES:**

The residents along Owens Road have expressed concern about the speeds along the roadway. The residents were provided the Neighborhood Traffic Control Program (NTCP) and requested three (3) speed humps along Owens Road. Owens Road runs between Union Hill Road and Arbor Hill Road.

Two speed studies were performed along Owens Road. The 85<sup>th</sup> percentile speeds for these studies varied between 37.8 mph and 40.9 mph at the two count locations. Due to this result, a 70% approval would be required during the petition process. A petition was submitted that showed a 70.5% approval from the residents within the Defined Service Area. There is no Homeowners Association for this area, so no letter of support has been submitted.
