

SUBJECT:

**Amendment 2 to Construction Agreement for
Hames Road Improvement Project.**

MEETING DATE:

April 2, 2024

SUBMITTED BY:

Jim Wilgus

SUGGESTED ACTION:

Consider approval of Amendment No. 2 to Construction Agreement for Hames Road Improvement Project, to Bartow Paving Company, Inc., for installation of a French drain system for the roundabout island, in the amount of \$55,072.52.

FACTS AND ISSUES:

The Hames Road Roadway Improvement Project contains improvements along the entire length of the roadway. The project improves both the vertical and horizontal alignment, as well as adds sidewalks along the western side of the roadway. The project also adds a roundabout at the intersection of South Jett Road.

Since construction of the roundabout at Hames Road and South Jett Road, groundwater was discovered to be seeping out of the inner circle of the roundabout. Nova Engineering was consulted to design a repair method. Nova's solution is to install a French drain within the inner island circle of the roundabout and the outer island circle of the roundabout. The collected water will then be piped into the stormwater system for the roadway.

This unforeseen work was not anticipated in the original bid.
