

SUBJECT:

**Diesel Exhaust Removal System Maintenance
Agreement for Fire & Emergency Services.**

MEETING DATE:

August 5, 2025

SUBMITTED BY:

Amanda Postelle

SUGGESTED ACTION:

Consider request from Fire & Emergency Services to enter into a three-year agreement with SafeAir Corporation, for maintenance of SafeAir diesel exhaust removal systems located in various County fire stations, in the total amount of \$70,040.00.

FACTS AND ISSUES:

In 2016, SafeAir Corporation was awarded a contract through a formal RFP process. The contract covered the purchase, installation, and ongoing maintenance of diesel exhaust removal systems at 20 fire stations. These systems are critical for maintaining air quality and safety within the stations.

The original agreement included annual maintenance, which SafeAir has provided since installation. However, that coverage has now expired. To ensure the continued performance and safety of these systems, Fire & Emergency Services is requesting approval to enter into a new, three-year maintenance agreement with SafeAir Corporation.

Annual Cost Breakdown:

Year 1 (2025): \$22,000.00

Year 2 (2026): \$25,894.00

Year 3 (2027): \$27,170.00

This item is budgeted in the Fire Fund.
