

**SUBJECT:**

**Amendment 2 to Design Services Agreement for  
Holly Springs Parkway at Palm Street  
Intersection Improvements Project.**

**MEETING DATE:**

June 4, 2024

**SUBMITTED BY:**

Jim Wilgus

---

**SUGGESTED ACTION:**

Consider approval of Amendment 2 to the Design Services Agreement with Keck & Wood, Inc., for the Holly Springs Parkway at Palm Street Intersection Improvement Project, to add foundation investigation and structural analysis, in the amount of \$27,000.00.

---

**FACTS AND ISSUES:**

Palm Street runs between Hickory Road in downtown Holly Springs and Holly Springs Parkway, intersecting the east side of Holly Springs Parkway at an acute angle between River Park Boulevard and Toonigh Road; approximately 700 feet south of River Park Boulevard.

River Park Boulevard provides access to the mixed-use River Park neighborhood on the west side of Holly Springs Parkway. The intersection of River Park Boulevard and Holly Springs Parkway is signalized and is located adjacent to a bridge over the Patriot Railroad.

As part of the intersection layout, an additional arm needs to be added to the existing traffic signal pole at the southwest corner of Holly Springs Parkway and River Park Boulevard. Foundation investigation and structural analysis of the existing traffic signal base are required to determine if the existing signal pole can support an additional arm.
