BACKGROUND INFORMATION:

Glessner Group is involved in a wide field of industries, and services such as real estate, energy, metals trading, and venture capitals, operating worldwide through a network of international partners.

History

Started in 2005 as a CGI firm, providing photorealistic images for architectural projects, becoming one of the leading 3D companies in the world, working with renown names such as Arch. Oscar Niemeyer, Arch. Bjarke Ingels, and Arch. Martha Schwartz. Clients moved from Architects to Real Estate Developers, where we also provided them with marketing advisory, and soon becoming marketing advisors for other industries.

In 2015, together with WMA (Willy Müller Architects), we created CodeShare Group, in Barcelona, Spain.

In 2018, the company incorporates the Real Estate department focused on properties valued over USD 50M, such as office buildings, hotels, casinos, etc. . With the success of the department, we expanded to different investment opportunities in Venture Capital's market. (<http://glessnergroupp.com/about-us>)
