**BACKGROUND INFORMATION:**

LexisNexis Accurint Virtual Crime Center (AVCC) uniquely combines both law enforcement agency data and public record data in one platform which is searchable. AVCC has already interfaced with most Records Management Systems (RMS) and Computer Aided Dispatch (CAD) system providers, essentially breaking down communication barriers between departments, allowing the department to find crime patterns across jurisdictional lines, and quickly find those non-obvious connections between subjects of interest.

AVCC currently has over 1600 agencies providing data to Lexis Nexis including Cape Coral Police Department and the Lee County Sheriff’s Office. Access to this data will allow the police department to search other agencies records that contribute to their system which in returns saves valuable time and resources during investigations and daily workflow. Some of additional benefits includes but are not limited to: access to data linked with public records, national crime maps, and data analytics for entire agency.
