

Ordinance 25-33: Amending the Long Creek Treatment Plan Comprehensive Rehabilitation Project

Background:

For Engineering Amendment #2

Submitting Department:

Finance Department

Description:

On February 17, 2025, City Council approved Engineering Amendment #2 for the Long Creek Waste Water Treatment Plant Facility Rehabilitation project. The amendment was related to the additional scope of work needed by LKC Engineering to include hypochlorite storage and feed facility and a sludge dewatering facility to the project. The amendment increased the total contract awarded to LKC to \$3,173,000 and this budget amendment is a clerical adjustment to ensure the project is in line with existing contract obligations.

There are no additional obligations being requested at this time and the project is currently still in the Design and Permitting phase.

Recommended Action:

Approval
