STAFFED BY	Wright
ESTIMATED TIME	45 mins

SUMMARY STATEMENT

On March 11, 2026, the City Council affirmed Resolution 2025-03 (attached) regarding implementing paid parking in summer 2026, preferably by June 1 (if possible). Council also discussed where to have paid parking, how much to charge, grace period or days to pay, hours to charge, employees parking and discounts for certain groups and lastly, and acknowledged that the cost of streeteries will need to be evaluated. Council also asked what the metric of success of a paid parking program is and how we measure success. Council did not make any decisions in the areas of implementation outside of affirming paid parking and the timing of implementation.

For tonight's discussion, staff compiled the discussion by Council on March 11th and incorporated feedback form outreach meetings and staff discussions to create 8 scenarios of paid parking to assist council in making a decision on where, how much, what days and duration. Each scenario has an anticipated net revenue based on these factors. Staff will elaborate on council and the community's discussion on a success model that includes a shuttle service. Additionally, council will be asked to consider other policy decisions such as a reduced rates for seniors will provide a timeline for bringing forth special event and streetery pricing.

WORKSHOP DATE:	March 11, 2026

IMPACTS

Expenditure Required? Yes	Included in Budget? Yes Amount: 0
