SUMMARY STATEMENT

Staff will share an update on the Public Works Maintenance facility. The schematic level design was completed in 2024 and with the decision to outsource solid waste the facility needs to be "right sized".

The consultant team updated costs for the facility and is beginning the value engineering phase to reduce project scope. Multiple alternatives are being evaluated with the goal of reducing costs by $5.5m to bring the project cost to $20m. Status of VE will be provided to keep council informed as to progress and next steps.
