

Council Meeting: May 14, 2026	Prepared By: Jessica Christensen Buck, Parks and Recreation Manager Nalisha Williams, Assistant City Administrator
Topic: Heritage Park - Network Infrastructure and Connectivity Project Proposal	Action Required: Approval

Summary

The Heritage Park Building requires a reliable network infrastructure to support its operations, including security systems, staff use, and future usage needs. Staff have worked with the City's IT contractor to develop a proposal that provides consistent and scalable connectivity throughout the facility.

The proposed network infrastructure includes the installation of cabling, wireless access points, network hardware, and internet connectivity, along with system configuration. This infrastructure will serve as the foundation for technology within the building.

In addition to supporting general connectivity, the network is essential for the operation of the building's security systems, including cameras and electronic door access. The design also ensures the building can adapt to additional technology needs over time without significant upgrades.

Financial/Budget

The total cost for the network infrastructure and connectivity project is \$13,408.65. This cost is part of the overall Heritage Park Building project and will be funded through the Park Dedication Fund.

Staff anticipates upon project completion for phase 1 of Heritage Park, that \$1.5 million will be available for use in the Park Dedication Fund.

Options

1. Approve the network infrastructure and connectivity project proposal in the amount of \$13,408.65.
2. Provide staff with alternative direction.
3. Decline.

Recommendation

Approve the network infrastructure and connectivity project proposal in the amount of \$13,408.65.

Council Action

Approve the network infrastructure and connectivity project proposal in the amount of \$13,408.65.
