

<p>Council Meeting: November 13, 2025</p>	<p>Prepared By: Jessica Christensen Buck, Parks and Recreation Manager</p>
<p>Topic: Heritage Park Remaster - Change Order #6 (site)</p>	<p>Action Required: Approval</p>

Summary

As part of the Heritage Park Improvements, pedestrian lighting around the playground sidewalk was originally identified as an alternate in the project's bid package. At that time, City Council chose not to proceed with this alternate.

Following the City's notification of award for the Minnesota Department of Natural Resources Outdoor Recreation Grant Program, there was additional discussion regarding the pedestrian lighting. City staff contacted the DNR grant administration staff for clarification on eligible project expenses, and were informed that pedestrian lighting would qualify for grant reimbursement.

This presents an opportunity for the City to complete this enhancement with financial assistance through the grant program. The pedestrian lighting installation would occur in spring of 2026, aligning with the DNR's eligible funding timeline for project completion.

Financial/Budget

The proposed cost for the pedestrian lighting is \$165,600. The grant through the DNR requires a 1:1 match from the City, of which would come from the Park Dedication Fund.

Options

1. Approve the addition of pedestrian lighting around the playground at Heritage Park up to \$165,600.
2. Provide staff with alternative direction.
3. Decline.

Recommendation

Consider a motion to approve the addition of pedestrian lighting around the playground at Heritage Park up to \$165,600.

Council Action

Consider a motion to approve the addition of pedestrian lighting around the playground container at Heritage Park up to \$165,600.
