

Council Meeting: August 13, 2026	Prepared By: Kevin Mattson, Public Works Director,
Topic: Public Works Building - Lighting Upgrade and Rebate Program	Action Required: Direction

Summary

On May 18, 2024, Governor Tim Walz signed into law the 2024 Omnibus Environment and Natural Resources bill (Chapter 116.) This bill instituted the phase out of fluorescent lighting as part of the State's Clean Lighting Bill. The fluorescent lighting phase-out was originally introduced as Senate File 3345; its provisions were later incorporated into House File 3911. The Linear Fluorescent Tube restriction which prohibits the sale of new linear fluorescent lamps became effective January 1, 2026.

In response to this legislation, Public Works staff has researched alternative lighting solutions for the Public Works facility.

The most cost-effective solution identified was XCEL Energy's LED Instant Rebate program. Through this program, the cost of new lamps and ballasts would be offset by a rebate of 70% of the installed cost.

No labor costs will be incurred as Public Works staff will self-perform the installation.

The cost for the anticipated lighting upgrades is as follows:

Total Installed Cost:		\$10,739.05
Utility Rebate:		\$7,471.16
	Final Cost:	\$3,267.89

Financial/Budget

Xcel Energy's LED Instant Rebate Program states that the eligible rebate amount is 70% of the installed cost. The remaining 30% is recommended to be allocated from the 2026 General Levy Public Works Electric Utilities line item at an estimated cost of \$3,267.89.

Options

1. Authorize staff to execute the attached Customer Agreement for Xcel Energy's LED Rebate Program.
2. Decline

Recommendation

Authorize staff to execute the attached Customer Agreement for Xcel Energy's LED Rebate Program.

Council Action

Consider a motion to authorize staff to execute Xcel Energy's LED Rebate Program Customer Agreement.
