AGENDA SECTION:

REGULAR AGENDA

BACKGROUND/SUMMARY:

Perimeter Inc. is the first public safety platform to bridge AI-based evacuation planning with real-time, situational awareness mapping. When used for pre-planning, routes and specific details can be indicated ahead of time. When used during an emergency event, zones affected will be identified, and key locations will be noted. The single link will be shared via a public messaging channel. From planning, response, recovery, and after-action analysis, this keeps everyone aligned from exercises to operations, providing faster decisions, clearer communications, and a community that knows what to do and where to go. This is web and app-based.

This is the "Know Your Zone" platform we use alongside the Alert & Warning notification system.

The contract expired in December 2025 and was submitted for review in January. This is a retroactive contract due to contract reviews and agenda timing.

We have not used this product since the contract expired, but we had access to it if needed.
