**AGENDA SECTION:**

REGULAR AGENDA

**BACKGROUND/SUMMARY:**

The California Air Resources Board (CARB) Advanced Clean Fleets (ACF) Regulation, effective January 1, 2024, is the latest development in CARB's decade long history of setting increasingly stringent emission standards for mobile sources that are needed to protect the public health and welfare of Californians. The ACF Regulation requires fleets that are well suited for electrification to transition to zero-emission vehicles (ZEV) through requirements to both phase-in the use of ZEVs for targeted fleets (including the County's fleet as well as some contractors such as Recology) and requirements that manufacturers only manufacture ZEV trucks starting in the 2036 model year.

The ACF regulation applies to fleets performing drayage operations, those owned by State, local, and federal government agencies, and high priority fleets. The regulation affects medium- and heavy-duty on-road vehicles with a gross vehicle weight rating greater than 8,500 pounds, off-road yard tractors, and light-duty mail and package delivery vehicles.
