

Granbury City Council

AGENDA REPORT

Meeting Date: September 21, 2021

Item Number: 6.8

SUBJECT: Discuss and take action to authorize the City Manager or his designee to execute the proposed Memorandum of Understanding for other governmental agencies to partner with the City of Granbury in the Granbury Regional Radio System.

BACKGROUND/DISCUSSION

The city of Granbury is in the process of the installation of a trunked radio system that was approved earlier this year. A key component of this radio system anticipated that Granbury would be creating the Granbury Regional Radio System in with other first responding agencies and governmental agencies could join and be a part of this program. There are fees associated with being part of this system and it is essential to have many partners or members of the system. The pricing structure is designed to allow for participating agencies to pay their fair share of the cost to maintain the system.

FINANCIAL IMPACT

The only financial impact to the city related to this agenda item is revenue to assist the city with the cost of long term maintenance for the Granbury Regional Radio System.

PRIOR BOARD OR COUNCIL ACTION

Council previously awarded this radio project to Harris L3 Communications. Purchase orders have been issued and deliverables are forthcoming. We expect this system to be completed and operational in the fall of 2022.

SUGGESTED ACTION

Staff recommends the approval of this agenda item.
