

REQUEST FOR ACTION

Contract with GoodPointe Technology for Pavement Management Consulting Services

MEETING DATE:

May 18, 2026

ORIGINATING DEPT:

Public Works

AGENDA SECTION:

Consent Agenda

PRESENTER:

Amy Kreofsky

Action Requested:

Authorizing a contract with GoodPointe Technology in the amount of \$50,000 to complete the second phase of the City's Pavement Condition Index data collection.

Report Narrative:

The City maintains approximately 470 centerline miles of public streets. Industry best practice recommends updating Pavement Condition Index (PCI) ratings every three to five years to support effective planning, optimize pavement preservation timing, and ensure responsible stewardship of infrastructure investments.

In 2025, the City completed the first phase of a two-year PCI update, collecting condition data for approximately half of the roadway network utilizing AI pavement ratings completed by GoodPointe Technology. Pavement ratings were completed in Council Wards 1, 3, and 4. This modernized approach improved the consistency and objectivity of pavement ratings compared to historical manual assessments.

GoodPointe Technology was selected for this contract as pavement management consulting services are considered professional in nature, which allows for direct selection of a consultant. They completed the first year of PCI survey as well. The City has worked with GoodPointe for more than 20 years, utilizing both their pavement management software and consulting services. This longstanding relationship provides continuity and ensures seamless integration of the data into our existing system.

To complete the PCI update cycle, Public Works recommends awarding a Contract to GoodPointe Technology to survey the remaining Council Wards. Completing this second phase will ensure that all 470 miles of roadway have current, high-quality condition data within the recommended age range. Without updated PCI ratings, maintenance decisions for the unsurveyed portion of the network would continue to rely on aging or incomplete information, increasing the risk of costlier repairs and declining pavement performance.

Priorities & Foundational Principles:

Fiscal Responsibility & Sustainability
Quality Services

Policy Considerations & DEI Impact:

Accurate PCI data supports proactive maintenance strategies that extend pavement life and reduce long-

term costs. Completing the PCI update ensures equitable, data-driven decision making across all neighborhoods when completing pavement preservation.

Prior Legislative Actions & Community Engagement:

April 21, 2025: Council approved first year of PCI data collection with GoodPointe Technology

Fiscal & Resource Impact:

This contract will be funded through J2200 Street Reconstruction funds.

Alternative Action(s):

No alternative actions are suggested at this time.
