

**AGENDA # G.5**  
**Scio Township Board of Trustees**  
**Gelman Support for Residential Well Testing**

**FOR MEETING DATE OF:** January 9, 2024

**PREPARED ON:** 1/4/24

**PREPARED BY:** Kathleen Knol

**SUBMITTED BY:** Legal

**ITEM TYPE:** Possible Action

**BACKGROUND:** The Coalition for Action in the Remediation of 1,4 dioxane (CARD) has identified the need for expanded ground water testing to monitor the spread of 1,4 dioxane from the former Gelman Sciences site. The existing monitoring wells and residential well testing program are deemed inadequate to track the presence and movement of the pollution. The attached resolution adds Scio Township to those calling for Gelman to fund an expanded testing program for residential wells.

**RECOMMENDATION:** Trustee Knol and Supervisor Hathaway recommend adoption of the resolution.

**MODEL MOTION:** To approve the attached resolution calling for additional monitoring wells and expanded residential well-testing to address the 1,4 dioxane pollution from the Gelman site and to seek payment for these measures from Gelman.

**ATTACHMENTS:**

[Resolution to support EGLE testing program.pdf](#)

**QUESTION:** Shall this Resolution be ADOPTED?
