

AGENDA # J.5
Scio Township Board of Trustees
Metron Meter Presentation

FOR MEETING DATE OF: January 9, 2024

PREPARED ON: 10/22/23

PREPARED BY: Brandon McNiel

SUBMITTED BY: Utilities

ITEM TYPE: Discussion Only

SUGGESTED ACTION: I ask that the BOT listen to the Metron Meter presentation and ask any questions you may have.

BACKGROUND:

Utilities Department is transitioning to Metron Meters with support of the Board of Trustees, a move that will yield significant benefits.

Metron meters offer remote reading capabilities, utilizing Verizon Towers to collect readings, which are then transmitted to the Water-Scope program. This technology provides real-time data enhancing our water resource management and billing accuracy.

Our current Sensus meters have posed ongoing problems, leading to inefficiencies. The utilities department is no longer able to obtain MXU's the device that is mounted on the outside of the building that allows us to gather meter reads. Metron Meters represent an investment that will enhance our water management, ensuring quality service for our residents and aligning with our commitment to Scio growth and success.

During the budget discussions later this year the BOT will be asked to consider authorizing an expenditure toward the transition to Metron Meters.
