

Memorandum

TO: City Council
FROM: Stephanie Smith , City engineer
DATE: April 20, 2026
SUBJECT: Authorize execution of a cooperative agreement with Ramsey County for reclamite treatment on various city roads
ITEM NUMBER: 8.i
SECTION: CONSENT AGENDA

REQUESTED MOTION

To adopt Resolution No. 26-24 authorizing execution of the cooperative agreement PW2026-14 with Ramsey County for construction of reclamite treatment on city streets.

INTRODUCTION

To partner with Ramsey County for construction of reclamite treatment on city streets, the city must enter into a cooperative construction agreement with the county. Council authorization is required for the agreement.

DISCUSSION

The city is partnering with Ramsey County Public Works for reclamite treatment on city streets and the Bobby Theisen Park parking lot. Ramsey County has technical expertise and experience constructing this type of improvement, and partnering with them will allow the city to utilize that expertise as well as create a larger project that can have more favorable pricing.

Reclamite is a light surface treatment that helps seal small cracks and slow down aging. The reclamite is sprayed on the pavement and is covered with sand, which is swept up once dry. The process takes only a few hours, but treatment can extend the life of the road by 5 to 7 years before bigger repairs are needed.

The county provides design and bidding services to the city at no cost. Shoreview is responsible for the costs incurred with the contractor's work, inspection and construction administration. The city's estimated cost share is \$196,554.00. This work was included in the 2026 capital improvement plan and will be funded by the street renewal fund.

RECOMMENDATION

It is recommended the city council adopt Resolution No. 26-24 authorizing execution of the cooperative agreement PW2026-14 with Ramsey County for construction of reclamite treatment on city streets.
