

Memorandum

TO: City Council
FROM: Tim Cooney , IS Manager
DATE: May 19, 2025
SUBJECT: Authorize the purchase of security cameras, door card readers, supplies, and installation labor for the new Commons building.
ITEM NUMBER: 8.1
SECTION: CONSENT AGENDA

REQUESTED MOTION

To award the proposal for security cameras, door card readers, supplies, and installation at the new Commons building to Cable Cloud in the amount of \$30,454.00.

INTRODUCTION

The city council is being asked to approve a proposal to purchase security cameras, door card readers, supplies, and installation labor for the new Commons building.

DISCUSSION

In an ongoing effort to deter vandalism, protect and secure city facilities, and make building access easier for employees and associations, city staff has been standardizing how park and city buildings are secured, by adding security cameras and door card readers. Staff recommends doing this at the newly constructed Commons building as well.

Over the last couple of years, security cameras and door card readers have been added to other city buildings and have proven to reduce, if not eliminate, vandalism at these locations. There has also been a reduction in operating costs due to staff no longer having to issue keys and rekey door locks, along with the hours saved by not having to perform and manage these additional tasks.

City staff solicited proposals from two vendors:

- Parallel Technologies – \$34,392.45
- Cable Cloud – \$30,454.00

The city is currently working with Cable Cloud at the new Bobby Theisen park building. Staff feel their familiarity with the requirements of this building will allow them to easily transition to completing the work at the new Commons building.

RECOMMENDATION

City staff recommends the city council approve the Cable Cloud proposal in the amount of

\$30,454.00, to purchase and install security cameras and door card readers in the newly constructed Commons building.
