

**CITY COMMISSION AGENDA ITEM REPORT**

**DATE:** June 10, 2026

**SUBMITTED BY:** Tanya Sterling

**ITEM TYPE:** Resolution

**TEMP. RESOLUTION NUMBER:**

**AGENDA SECTION:** **PUBLIC HEARING(S)**

**TITLE:** TR14403 - A Resolution of the City Commission of the City of Tamarac, Florida, approving and authorizing the execution of an Agreement Between the City of Tamarac and RedSpeed Florida, LLC, Attached Hereto as Exhibit "1", for a School Zone Speed Detection Camera System; providing for conflicts; providing for severability; and providing for an effective date.

**RECOMMENDATION:** The City Manager recommends approval of the Resolution authorizing the City Manager or designee to execute the Agreement between the City of Tamarac and RedSpeed Florida, LLC for a Speed Detection Camera System for School Zones, at its June 10, 2026 meeting.

**BACKGROUND:** On June 10, 2026, the City Commission approved an ordinance creating Article V of Chapter 14 of the City Code entitled "School Zone Speed Detection Systems for Enforcement of School Zone Speed Limits." The ordinance authorizes the use of automated speed detection systems in school zones where heightened safety risks have been identified based on traffic data and other supporting evidence. The ordinance also authorizes the City to enter into agreements necessary to implement and administer the program.

As part of the City's evaluation process, a two-day traffic study conducted in March 2026 identified significant speeding activity within multiple school zones throughout Tamarac, including numerous vehicles traveling more than 10 miles per hour above the posted school zone speed limit during active school zone periods. These findings supported the City Commission's determination that additional enforcement measures were warranted to improve safety for students, parents, school staff, and motorists.

## Procurement

The proposed Agreement is being presented through a piggyback procurement. A piggyback procurement allows a governmental agency to utilize the results of another public agency's competitively solicited contract when permitted by applicable procurement regulations.

The City of Plantation conducted a competitive solicitation for School Zone Speed Detection Services and subsequently entered into an agreement with RedSpeed Florida, LLC on June 25, 2024. After review by staff and the City Attorney's Office, it was determined that the City of Tamarac may utilize the competitively procured agreement and enter into a substantially similar agreement with RedSpeed, thereby avoiding duplication of procurement efforts while maintaining compliance with applicable purchasing requirements.

### Agreement Summary

The proposed Agreement provides a turnkey School Zone Speed Detection System solution under which RedSpeed is responsible for furnishing, installing, operating, maintaining, and administering all components necessary for implementation of the program.

### Key services include:

- Installation and maintenance of speed detection camera equipment
- Violation processing and administrative support services
- Access to motor vehicle registration records as authorized by law
- Printing and mailing of required notices
- Payment processing and lockbox services
- Customer service and call center support
- Public education and awareness campaign assistance
- Web based enforcement review platform for authorized City personnel
- Reporting and program administration services required by state law
- Coordination of implementation activities necessary for program activation.

The Agreement provides for an initial term of three years, with the option for one additional five-year renewal period subject to mutual agreement of the parties.

### Program Safeguards

The Agreement includes several provisions designed to protect the City's interests, including:

- Required insurance coverage and indemnification provisions
- Compliance with all applicable federal, state, and local laws
- City ownership and access rights to program records and data
- Audit and reporting requirements
- Vendor responsibility for installation, maintenance, and operation of the system
- Vendor responsibility to assist in defending legal challenges related to the program
- City's ability to terminate the Agreement for convenience or cause in accordance with the contract terms.

#### Implementation

Upon approval of the Agreement, the City and RedSpeed will begin implementation activities, including installation of equipment, placement of required signage, public education and outreach efforts, system testing, and compliance with all statutory notice requirements. Consistent with Florida law and City policy, a public awareness campaign and warning period will be conducted prior to the issuance of citations. The program will initially operate only during active flashing school zone periods associated with school operations, consistent with direction previously provided by the City Commission.

Approval of the proposed Agreement with RedSpeed Florida, LLC will allow the City to implement the School Zone Speed Detection System Program authorized by the City Commission. The program is intended to improve safety within school zones, encourage compliance with posted speed limits, and provide an additional enforcement tool designed to protect students, parents, school staff, and the public.

#### **STRATEGIC GOALS:**

Goal #2 : Tamarac is Safe and People Know It
