

**BUSINESS OF THE CITY COUNCIL  
YAKIMA, WASHINGTON  
AGENDA STATEMENT**

Item No. 7.H.  
For Meeting of: September 3, 2024

**ITEM TITLE:** Resolution authorizing an Agreement with Evergreen StormH2O to provide engineering design services for the Randall Pond Outlet Water Quality Treatment Project SW2634

**SUBMITTED BY:** Scott Schafer, Director of Public Works  
\* Mike Price, Wastewater/Stormwater Manager

**SUMMARY EXPLANATION:**

The City of Yakima (City) operates the Randall Park Pond as a stormwater detention facility in compliance with the Department of Ecology (Ecology) Eastern Washington Phase II Stormwater Permit. Water leaving the Pond enters Wide Hollow Creek through an outlet at the southern end of the Pond. In April 2024, the City accepted grant funding from Ecology for the selection and design of Best Management Practices (BMP) to reduce pollutants entering Wide Hollow Creek from the Pond.

The City used the Municipal Research and Services Center (MRSC) of Washington roster, a statewide consultant roster system, followed by a competitive selection process in selecting Evergreen StormH2O to perform the required engineering services. The proposed Agreement in an amount not to exceed \$547,090, provides for an alternative analysis, permitting, and 90% design of the selected BMP.

<u>Ecology Share</u>	<u>City Share</u>	<u>Total Agreement Cost</u>
\$424,847	\$122,243	\$547,090.

The Agreement, including EXHIBIT A - SCOPE OF WORK, is attached for City Council review. Funding for the City Share of expenses is from Stormwater Capital Fund 442.

**ITEM BUDGETED:** Yes

**STRATEGIC PRIORITY 24-25:** A Safe and Healthy Yakima

**RECOMMENDATION:** Adopt Resolution.
